Notification of Revised Shrinkage Proposals 2012/13

SGN has undertaken a review of the forecasted shrinkage volumes for 2012/13. This has resulted in a forecasted reduction in shrinkage volume for 2012/13.

The original Initial and Final Shrinkage Proposals for 2012/13 were calculated prior to the assessment of the 2011/12 volumes.

After looking at all the factors including the impact of the 2011/12 actual shrinkage volumes, SGN has revised its proposals to endeavour to provide a more accurate forecast and minimise year end reconciliations.

If you require further clarification, please email me on rawinder.basra@sgn.co.uk.

Yours faithfully

Rawinder Basra
