Good Afternoon JO,

NGN just wanted to advise that we have been carrying out a pre-scheduled review of our GSR process since November 2017, which has not yet completed.

Once this is finalised, we will provide the requested information for DWG Action 0201.

Kind regards,

Shanna Key

J.O

Cadent continue to comply with the provided flow chart.

In addition, Shippers also now receive a monthly report (Modification 0518S) outlining which of their meters have been removed 6 months previously and another monthly report (Modification 0469) detailing the action that has been taken at every Supply Point which has progressed through the GS(I&U)R process..

Regards

Joint office.

Further to DWG action 0201.

WWU confirms it complies with the generic GSR process subject with the exception of the three minor variations listed in the attached document.
