

UNC 0657:

Introducing AQ Reporting to the PARR Schedule reporting suite

Proposer: John Welch

Panel Date: 11/05/2018

Why change?

- When PARR schedule 2 reporting was created, no provision was made for AQ movement reporting.
- This represents an important omission, and is required for PAC to see a holistic view of post Nexus performance.
- To change or update the PARR, a UNC modification is required.
- This modification is being raised on behalf of the PAC.

Options

- Leaving the PARR as it is means PAC will not have access to named AQ reporting.
- UNC modification is currently required to update the PARR.

Solution

- Add AQ reports as detailed in the modification to the PARR schedule of reports (section V, 16.1.2 of the UNC highlights the need for modification to update the PARR).
- Only section B of the schedule to be updated (as change order XRN4525 will provide very similar anonymised reporting to the industry)
- Reports have been specified using percentage of portfolio movement rather than energy values.

Recommended Steps

- The Proposer recommends that this modification should be:
 - Not subject to self-governance because the requested reports will be named and while only visible to the PAC still retain some sensitivity. Material impact to competition could arise through greater transparency of reporting of AQ movements.
 - Workgroup assessment to develop the modification for 3 months.
