NTSCMF Action 0901

Which charges apply to PARCAs and when do they apply

- Publication – updated each October – issued along with the Final October Commodity charges at end of July / early August. Updated in the Charging Statement from each October.
- PARCA application: the security amounts are based on the prices in the prevailing charging statement effective at the time of the application.
- At September NTSCMF there was a question about the PARCA security amounts and if it would still work under any changes (e.g. if any of the 0621 modifications were implemented):
 - The calculation to determine the prices will continue to work irrespective of the Reference Price Methodology in place (e.g. if one of the 0621 modifications is approved), as there are no changes to the capacity products.
