# Brexit Update

- National Grid has identified references to EU legislation that would need redirection to UK legislation and other minor changes (eg: removal of references to ACER and ENTSOG) in case of a no deal scenario.
- No operability issues have been identified on exit day

## Next Steps

**We are proceeding on the basis of a no-deal outcome:**

- BEIS is drafting Statutory Instruments, due to be published in December (expected this week)
- In January 2019 NG NTS would launch the code change process
- As far as possible, Code changes will be made via the self-governance process although Urgent procedures may be considered.
