

EUC09 Sites not in Class 1

PAC Update August 2019

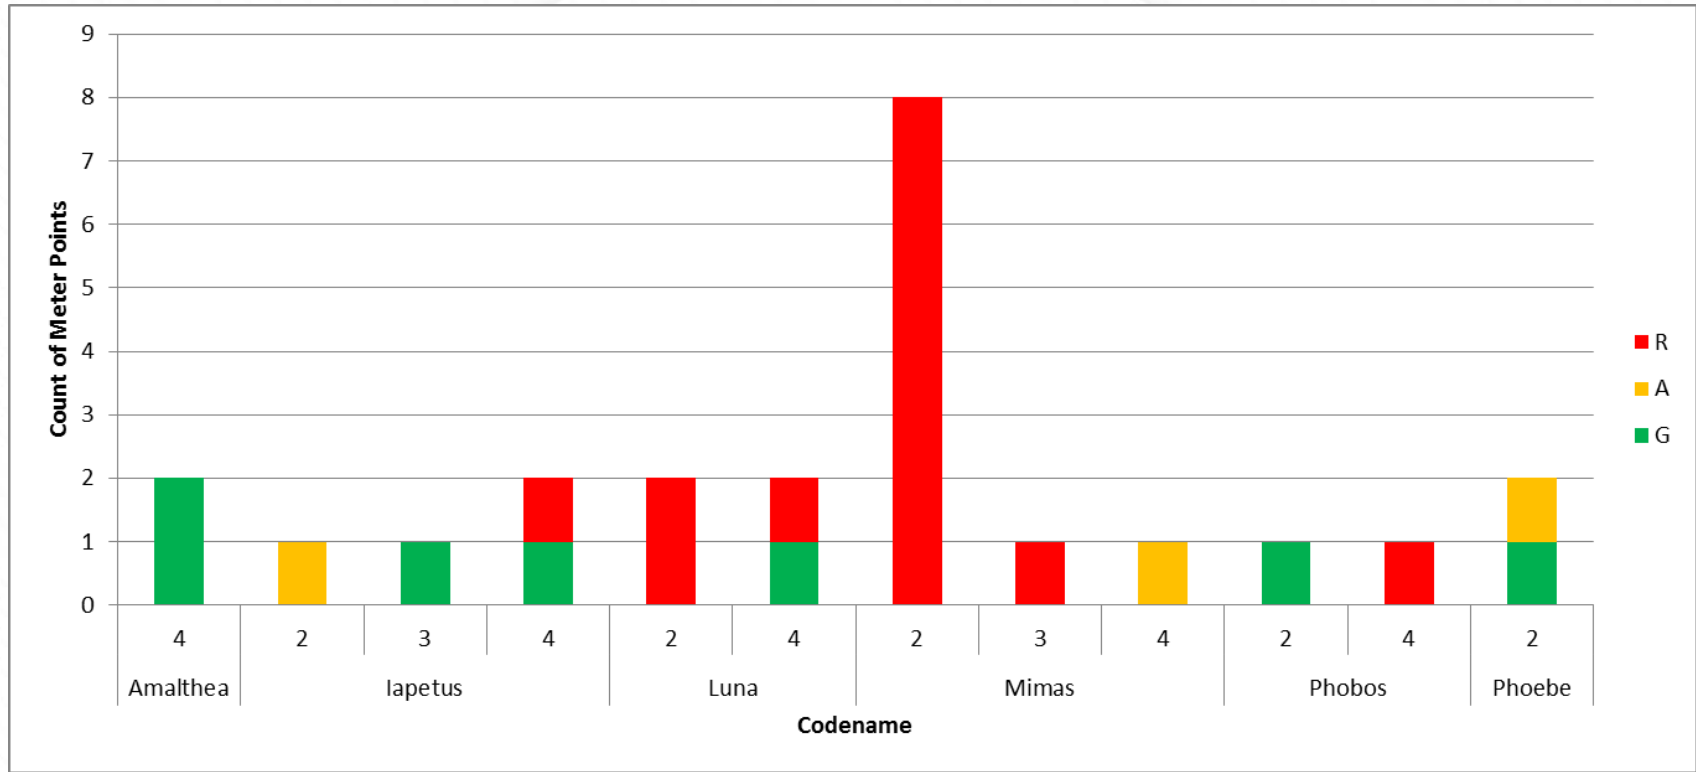

Recap

- UIG Task Force identified sites with AQs over the Class 1 threshold that are still in Class 3 or 4 (Issue 3.2.1)
- Obligations set out in UNC G1.6.15
- These sites should be re-confirmed as Class 1 by the Shipper after 3 consecutive AQ calculations above the threshold in a six-month period, or after 18 months if every calculated AQ is above the threshold
- These sites could be contributing to daily UIG if their usage pattern is very different to the EUC09B NDM profile
- Raised at UNC UIG Workgroup in January – recommended engagement by Xoserve and monitoring at PAC – last update provided at June PAC

Overview of Statistics – Changes since June

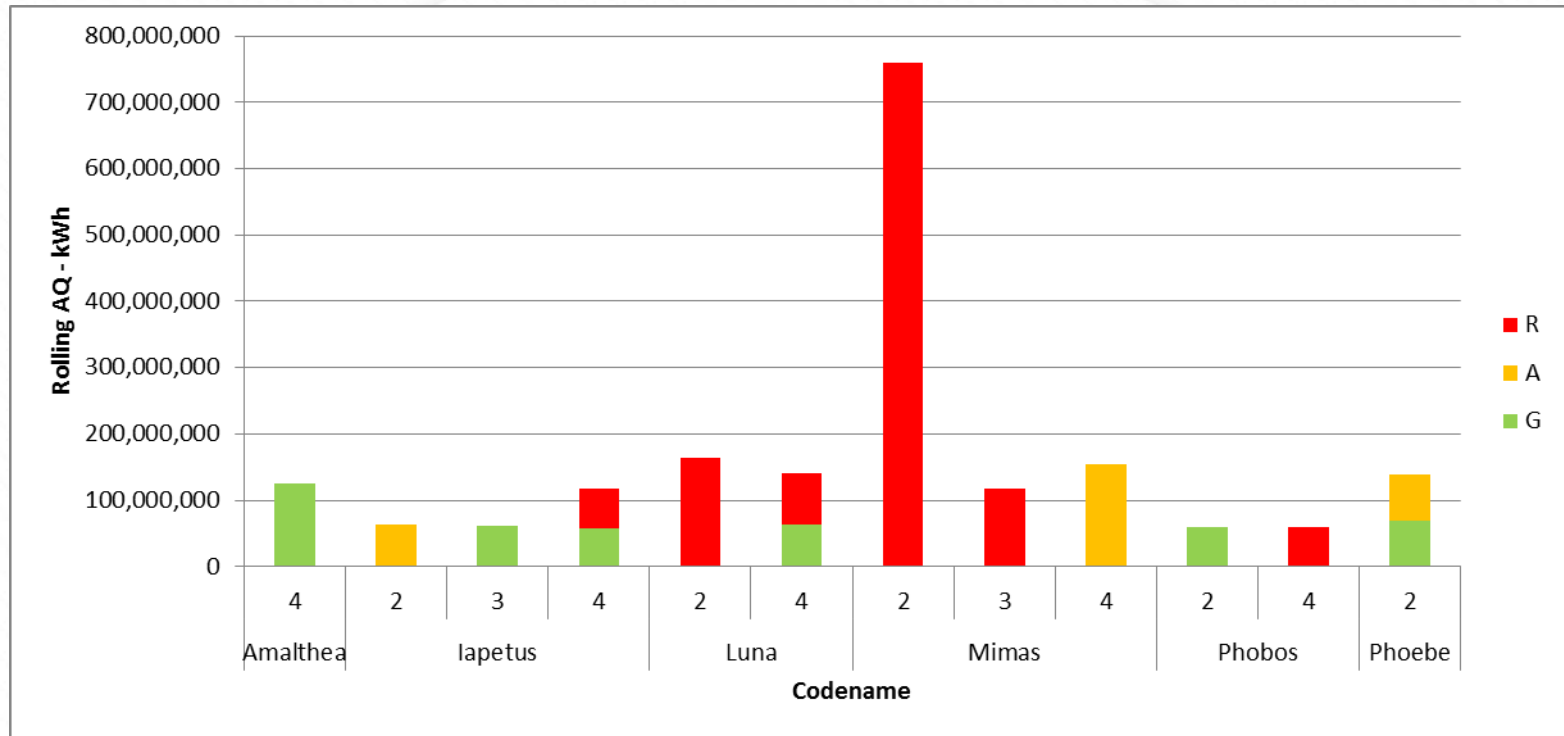

- As not yet included in the PARR, these stats have used the anonymised “Moon” codes
- Stats include Class 2 and 3 sites – should be converted to Class 1 once qualifying criteria are met
- 4 Class 3 or 4 sites, total AQ 0.3 tWh (decrease of 6 sites)
- 10 Class 2 sites, total AQ 0.9 tWh (decrease of 3 sites)
- Plus 3 sites which are over threshold and close to qualifying criteria (total 0.3 tWh), 7 sites over threshold, not close to qualifying (total 0.4 tWh)

EUC09 Sites as at 31 July 2019 – COUNT, by Class

R = G1.6.15 criteria met, A = Close to qualifying period met, G = newly increased to EUC09

EUC09 Sites as at 31 July 2019 – AQ, by Class

R = G1.6.15 criteria met, A = Close to qualifying period met, G = newly increased to EUC09

Observations

- Now only four Shippers with Red sites
- None of the remaining Red sites had a meter reading loaded in July
- Site previously highlighted as Annually read with an AQ of 154,000,000 kWh has not had any further readings – still reported as Green due to lack of AQ calculations

Update since June meeting

- PAFA already engaging with Shippers who have sites in the “Red” category
- Count of sites and total Rolling AQ have both increased
- UNC Mods 0690 and 0691 now raised – reduce qualifying period and create CDSP obligation to convert sites to Class 3 once criteria are met (i.e. at Red status)

The image features a stylized house shape with a gabled roof, centered on a background of fine, light-colored diagonal lines. The house's main body is a rectangle divided into four vertical panes, resembling a window. The word "xserve" is written across these panes in a blue, sans-serif font. The 'x' is composed of two overlapping chevron shapes. The entire graphic is framed by a dark blue horizontal bar at the top and a light blue horizontal bar at the bottom.
