

UNC 0704:

Mod Title: Review of Transporter Theft Reporting

Proposer: David Mitchell

Panel Date: 17th October 2019

Why change?

- It was identified at the 0677R Shipper and Supplier Theft of Gas Reporting Arrangements review group that the current theft of gas reporting needs amending so that it is clear and adds value to the process.
- This change should be made as it will rationalise the Transporter Theft of Gas reporting.
- Reporting measures are currently duplicated across codes.

Options

- Remove cross code duplication of Transporter Theft of gas reporting currently in both SPAA and the UNC, reporting will be solely in the UNC and via Transporters annual RRP return.

Solution

- This change will allow the Transporter Theft reporting in SPAA Schedule 33 to be removed under SCP480.
- Transporter reporting will be contained solely in the UNC and the RRP.
- Transporters Theft of Gas reporting will be made available each month, this will be collated by the CDSP and provided to the Joint Office for publication.

Recommended Steps

- The Proposer recommends that this modification should be:
 - Subject to self-governance
 - Workgroup assessment to review the modification noting that this modification has been recommended by the 0677R Shipper and Supplier Theft of Gas Reporting Arrangements workgroup
 - Proceed to consultation
