

**Action 0606: Mod 186 Reporting at DNCMF: Xoserve and Gas Transporters to investigate the matter and provide a statement to the JO for publication to the Workgroup by 10 July 2020.**

The 4 Distribution Networks have carried out preliminary investigations into the cause of the forecast revenue reduction. We have also requested and received the full data set of all the AQ amendments from Xoserve which contributed to the reduction.

As a consequence of our initial enquiries we have opened a line of communication with the Shipper and continue to keep Ofgem informed.

In answer to the specific questions:

- The effect was replicated across all networks.
- TPD G1.6.20 and G1.6.24 were the sections of UNC applied.

Our investigation is ongoing.
