

# Connection Charging Statement Annual Review

**Nicola Lond**  
**Gas Connections Contract Manager**

**nationalgrid**

## Connection Charging Annual Review

- In accordance with UNC the Connection Charging Statement is reviewed on at least an annual basis.
- The last review was carried out in late 2019 and the revised Connection Charging Statement published on 17th January 2020.
- The proposed scope of this year's review is explained in this presentation and the Timeline expected.

## Proposed Scope of annual review

- **PARCA/CAM**

- Additional variation fee to allow cost recovery for the variation of a PARCA.

- **A20 fees**

- annual review to identify any required uplifts.
- Minor Modification clarification regarding Gas Quality modifications.

- **New Connection Fees -**

- Self Lay - Following commissioning of the pilot project, a new fee is being considered for Self Lay applications where a Self Lay organisation is to carry out the works on behalf of the customer, rather than National Grid being responsible for the works.
