Background

Accuracy of By-Pass flag & status:

- PAC concerned with accuracy of Meter By-Pass status on UKLink
- Shippers were asked to review affected MPRs in their portfolio and correct where necessary
- Datasets issued for 55 short codes in October 2020 (request to investigate all sites with 'Open' and up to 5 sites with 'Closed' status)
- Further analysis identified 106 MPRs at 'Open' status but with evidence of progressing reads – issued to shippers in March'21 for investigation

By-Pass Consumption Adjustments:

- General absence of Consumption Adjustments (CA) following period of 'Open' By-Pass
- Correla (on behalf of Xoserve) now actively chasing outstanding CA's directly with relevant shipper(s)

By-Pass Flag and Status Update

Table below shows movements in Meters with By-Pass as recorded on UKLink

Snapshot Date / Summary	Jul'20	Nov'20	Dec'20	Jan'21	Feb'21	Mar'21	Apr'21	May'21	Jun'21	Jul'21

- The reduction of 40 meters recorded on 'Open' By-Pass status observed in July'21 is almost entirely related to the 106 meters sent to shippers for investigation in March'21

By-Pass Consumption Adjustments

UNC Requirement (M2.4)

- When a By-Pass is 'Closed', shippers to submit a Consumption Adjustment, where estimate is 10,000 kWh or greater, within 15 business days

Monitoring agreed by PAC

- Correla (on behalf of Xoserve) to actively chase outstanding CA's directly with relevant shipper(s)
- Summary of requests for CA's following Open By-Pass and resulting outcomes are provided on next slide

Further status changes anticipated over coming months as shippers complete their investigations (most of which are reliant on site visits)

Thank you
