

MDD challenge to reallocation request

Customer Type – Meter Asset Manager (MAM)

### **General background information**

Morrison Utility Services (short code MOR), company registered number 04530602, changed its name to Morrison Water Services on 3<sup>rd</sup> April 2021. At the same time as the company registered name change, the activities undertaken by the Metering Department moved to the company registered as Morrison Energy Services Limited (company number 012291202).

The MCoP accreditation is now against Morrison Energy Services Limited rather than Morrison Water Services.

### **Issue Statement**

The information recorded on UK Link for Morrison Energy Services Limited are registered against the MAM ID of MOR.

For Morrison Energy Services Limited to see data in Data Enquiry Service or for the Suppliers associated to Morrison Energy Services to be able to update UK Link, they would need access to the short code currently registered against Morrison Water Services.

### **Request**

Morrison Energy Services requests that short code MOR is reallocated to Morrison Energy Services Limited.

Can COMC approve the reallocation of MOR to Morrison Energy Services Limited?
