

6.1 Suggested Update to Publication of WAR Band and NDM Sample Data Reports

Background

The PARR document (Performance Assurance Report Registers) includes the following reports within the PAC suite:

2B.12. NDM Sample Data Submission

2B.13. WAR Band Read Submission and Calculation

The PARR definitions both currently state:

“Report will not be part of the regular PARR delivery and will not be published on Huddle. CDSP will provide the data to the PAC at the relevant months meeting.”

This makes it harder for PAC to consider the reports in context with other reports, as they are not in the monthly report spreadsheet. There are no corresponding Anonymised (A) reports.

Proposal

We are proposing that the PARR is updated to allow both reports to be included in the monthly spreadsheet of reports. The sentence quoted above would be removed.

Timing of this change

The PARR document requires UNCC approval for any updates. Proposed changes are presented to PAC first to gain their support before presenting at UNCC (although any party may propose changes to UNC related documents at UNCC, and UNCC will vote on them).

Options for the timing of this change are:

- a. Make an immediate change to the PARR, eg bring a proposed draft to the March meeting, for approval at April UNCC; or
- b. Make this change the next time that the PARR is updated, which may be for Modification 0743S if that is approved; or
- c. Do not make the change and leave the reporting for these two topics as-is.

Request from PAC

PAC views and consensus/majority decision on this proposal.
