

# UNC 0812R:

Review of alternatives to “must read”  
arrangements

Proposer: Richard Pomroy

Panel Date: 21st July 2022

# Why change?

- The current must read arrangements are out of date and need reviewing in the light of
  - the introduction of the Performance Assurance Committee
    - the PAC is now responsible for settlement accuracy
  - changes in meter reading provision
    - for example, transporters no longer provide other meter reading services

# Options

- Continue with existing arrangements – the proposer believes that this is no longer sustainable
- Put in place other arrangements should a Shipper not submit the required meter reads

# Solution

- The review will look at whether specific measures should be put in place to replace the current must read process, or whether the issue of meter reading performance should be left to the Performance Assurance Committee

# Recommended Steps

- The Proposer recommends that this review should be:
  - Sent to workgroup for 6 months with the expectation that a modification will result
