

# NG TRANSMISSION CHANGE HORIZON

## In-flight and Potential Programmes & Projects 2023-24

2023/2024

### Key Points

- UNC Modification 761 timeline estimated as high levels of uncertainty on expected decision date

# Gemini Sustain Plus Engagement

- **The dedicated Gemini Sustain Plus Focus Groups will start in September 2023.** These will be recurring sessions over the next 12 months to support the industry to prepare for the go-live in September 2024
- The Focus Group is designed to provide an overview and detail on the specific changes to Gemini and the impacts to interested parties, from both a technical and operational perspective. The type of areas we intend to cover at the Focus Groups are as follows:
  - **Demonstrate how the whole user experience will be impacted: (e.g. share changes to the log-in process)**
  - **Provide an overview on how to integrate the changes into your own systems (e.g. APIs)**
  - **Share approach on the updated training solution**
- **The first Focus Group will now be a virtual event:**
  - **Date: Monday 25<sup>th</sup> September 2023**
  - **Time: 13:00-15:00**
  - **Invitation to follow via UK Link Distribution.**
- **A Gemini Sustain Plus webpage is now live.** The webpage covers the scope of the programme along with providing answers to common queries. It will be updated periodically throughout the programme. The website is available via the following link: [Gemini Sustain Plus \(xoserve.com\)](https://xoserve.com)
- **A Gemini Sustain Plus launch video** has also been created which can be accessed via this [link](#)
