

PAC – June 2023

Proposed PARR report for review

IGT Modification 159V

Title: IGT159V – Amendments to the Must-Read Process

Purpose: To update the Must-Read process to include timescales for a site to enter the process, and to introduce timeframes for procuring and returning a read that align with Central Data Service Provider (CDSP) validation criteria.

Status: Modification approved and awaiting implementation

Indicative implementation is November 2023 but this is subject to the preferred option and progression through the DSC change process

PARR reporting requirement:

- A Schedule 2A – Industry Peer Comparison View and a Schedule 2B – PAC View report is required
- Based on this an update to the PARR is required

IGT Modification 159V

- The principle of the IGT159V PARR reports is to:
 - Provide a view of the IGT sites which should have triggered a must read being generated but have been excluded due to a known meter issue or paused for 80 SPSBDs due to a change in Shipper event
- **The Schedule 2A and 2B proposed reports have been published on the June PAC meeting page for review**

Next steps:

- PAC to review the proposed PARR reports for Modification 0734S
- The PARR to be updated to include the new PARR reports for Modification IGT159V in line with implementation
