Document Purpose

This document is intended to provide a single view of a change as it moves through the change journey. The document is constructed in a way that enables each section to build upon the details entered in the preceding section. The level of detail is built up in an incremental manner as the project progresses.

The template is aligned to the Change Management Procedures, as defined in the CDSP Service Document. The template is designed to remove the need for duplication of information. Where information is required in one section but has been previously captured in a previous section, the previous section will be referenced.

The summary table on the front page shows the history and the current status of the Change Proposal.

| Overview of propo | osed change | | | |
| Change Details | | The annual Shrinkage adjustment submissions from the networks are not getting apportioned correctly when the adjustment period spans go live date. As part of the initial design when the Go live date was 01.Oct, the system was designed to split the submission period (previous financial year) into two 6 month variances. The smearing process for annual shrinkage was designed accordingly to apportion each submission into 6 months. But since the go live date is changed to 01.June, this design is now not working as the submission period will be split based on the go live date into variances that may not be for a 6 month period. | | |
| Reason(s) for proposed service change | | Currently the smearing process for Annual shrinkage process in SAP is designed to consider the variance period as 6 months and will not work as expected with the new Go live date as 01-June-2017. This will result in incorrect charges present in the amendment invoice (AMS) and will have financial impacts to Networks revenue. | | d as 6 months and will not work as 01-June-2017. This will result ndment invoice (AMS) and will |
