Document Purpose

This document is intended to provide a single view of a change as it moves through the change journey. The document is constructed in a way that enables each section to build upon the details entered in the preceding section. The level of detail is built up in an incremental manner as the project progresses.

The template is aligned to the Change Management Procedures, as defined in the CDSP Service Document. The template is designed to remove the need for duplication of information. Where information is required in one section but has been previously captured in a previous section, the previous section will be referenced.

The summary table on the front page shows the history and the current status of the Change Proposal.

	If the solution is to split the files, consideration will be required to provide a unique sequential number within the file name which is not duplicated or will be duplicated.
	Whilst it is acknowledged that this change cannot be implemented for NEXUS Go Live date, this change is required for an early release to ensure that the Xoserve solution remains fit for purpose for the enduring period as the Smart Roll out ramps up. Whilst it was expected that it would be year 3 following Go Live that the peak of the roll out would be in effect, the original plan is 4 years behind. Therefore a revised roll out plan may include high numbers more immediately.
	An IA to inform our external stakeholders of timelines and costs to make this change is required at the earliest opportunity.
	Requirement relevant to the Request:
	There is a requirement for Xoserve to receive and process a DXI file and respond with a DXR file with no lower or upper size parameters.
	Currently there is a restriction in UK Link where a single file cannot exceed 250k MPRNs in a single file otherwise the file will be rejected.
Reason(s) for proposed service change	The change is required to ensure that the treatment of the DXI and DXR files meets the obligations in the Smart Energy Code.
	The SEC does not stipulate a size restriction and therefore the DCC / DSP can submit a file of any size.
