RE: Future status of the Joint Office of Gas Transporters

Thank you for the opportunity to submit our comments regarding the Future of the Joint Office.

E.ON is supportive, in principle of the creation of a new limited company; indeed, this is in line with the models adopted by other code administrators and is a sensible approach.

We do wish to convey a few points for consideration:

- We would advocate for there to be at least one Shipper representative on the Board of Directors
- We are disappointed at the absence of clarity or plans for next steps, which leads to uncertainty regarding whether there will be any additional costs and if so, how these will be funded.

Yours faithfully,

Clare Manning
