

Demand Estimation Sub-Committee (DESC) Key Messages - 6 March 2024

Agenda Item Outcomes

Agenda Item 3.0: Modelling Approach – Gas Year 2024/25

DESC approved the Modelling Approach document which sets out the End User Categories (EUCs) and how the underlying EUC Demand Models and Profiles for the new Gas Year will be derived. The final document will be published shortly on the 6 March meeting page.

Reminder: The Demand Modelling process relies, in part, on sample data provided by eligible Shippers (as defined in UNC Section H 1.6). The deadline for submission of data is close of play on Monday 8 April 2024. Updated guidance, including file format is available on the Joint Office website [here](#).
