Dear Tim

Re: Modification 0279

Total Gas & Power fully supports this modification.

The increased availability of meter readings will improve the accuracy of the AQ review and we can see no drawbacks with the modification. We would like to see the modification taken one step further to allow the report to be purchased on an adhoc basis. If the report was available on request it would allow shippers to accurately appeal the AQs of newly acquired sites. The increased availability of reads only serves to increase the accuracy of AQs and would allow shippers to make accurate appeals based on reads immediately, as opposed to having to wait for 6 months. This would be of particular use when a shipper takes on a large group of sites in one time period. Reads could be used to quickly validate the previous shippers AQ as well as the opening reads.

This modification is currently designed to improve the accuracy of the AQ review but there is no reason why it can't make it easier to make more accurate appeals throughout the year.

Yours faithfully

Gary Regan
