

## National Grid Update on Theft of Gas Action from 27 June 2011 Shrinkage Forum

*Action SF0601 28/06/11 1.1 Transporters to provide a breakdown of 2010 Theft of Gas upstream incidents, i.e. the number of cases reported, the number of proven cases, an estimate of energy and an LDZ breakdown for consideration at the next meeting.*

The table below shows the number of reported Transporter Responsible Theft cases in 2010 (calendar year) within National Grid's Network as submitted in response to Ofgem's request for information.

Identified by:	Domestic	Non-domestic	Total
National Grid	189	81	270
Other (e.g. Shipper, Supplier, Xoserve)	74	14	88
Investigated	263	95	358

Confirmed	76	28	104
-----------	----	----	-----

Total estimated volume <sup>1</sup>	21.3GWh
-------------------------------------	---------

We do not have the above figures broken down by LDZ or the estimated volume by SSP/LSP split. The Xoserve Theft of Gas team has confirmed that this data is not readily available and a Change Request would be required to access the data from the reporting system.

---

<sup>1</sup> It should be noted that this represents the estimated theft volume over a number of years for the cases identified within 2010 and is not, therefore, necessarily representative of one years volume of theft.
