## Document Purpose

This document is intended to provide a single view of a change as it moves through the change journey. The document is constructed in a way that enables each section to build upon the details entered in the preceding section. The level of detail is built up in an incremental manner as the project progresses.

The template is aligned to the Change Management Procedures, as defined in the CDSP Service Document. The template is designed to remove the need for duplication of information. Where information is required in one section but has been previously captured in a previous section, the previous section will be referenced.

The summary table on the front page shows the history and the current status of the Change Proposal.

If a retrospective effective date is specified – within the APPNT and READG datasets – this must be within the Users ownership.             <ul style="list-style-type: none"> <li>Amend the rule to allow for an update to have an effective date prior to the period of ownership providing no other User has a confirmation at LI or CO on the effective date.</li> </ul> </li> </ul> <p><b>Validations already in place for ONJOB and ONUPD files at RQ and CO stages of the confirmation period are to remain unchanged.</b></p> <p><b>The earliest allowable installation date should replicate the rules when carrying out an installation at RQ and CO status.</b></p> |                             |
| Reason(s) for proposed service change |                 | <p>At present the RGMA validation rules do not allow for an asset update to be recorded pre D-2 of the confirmation effective date once the confirmation has progressed to this stage and cannot pre-date the confirmation effective date once the confirmation has gone live.</p>  |                             |

|  |   |
|--|---|
|  | Therefore, and particularly on first registration or a registration following an isolated period the Registered User cannot record the meter installation for the correct date (if the meter was installed prior to D of the confirmation effective date).  |

| <b>Required Change Implementation Date</b>   | June 2018   |
| <b>Please provide an assessment of the priority of this change from the perspective of the industry.</b> | <p> <input type="checkbox"/> High<br/> <input checked="" type="checkbox"/> Medium<br/> <input type="checkbox"/> Low         </p> <p><b>Rationale for assessment:</b> Should there be a delay to issuing of metering information, this could lead incorrect information being held on central systems. Providing all industry systems are maintained this change is not a priority, but given maintenance of industry data is a priority this change should not of low priority. Therefore, we have deemed the proposal to be medium priority and should be introduced as soon as reasonably possible.</p> |

## Section 4: ROM Analysis

This ROM is Xoserve's response to the above Evaluation Service Request. The response is intended to support customer involvement in the development of industry changes.  
Should the request obtain approval for continuance then a Change Proposal must be raised for any further analysis / development.

### Disclaimer:

This ROM Analysis has been prepared in good faith by Xoserve Limited but by its very nature is only able to contain indicative information and estimates (including without limitation those of time, resource and cost) based on the circumstances known to Xoserve at the time of its preparation. ## Section 10: Business Evaluation Report (BER)

### Change Implementation Detail

1.) Detail changes required to the CDSP Service Description

2.) Detail modifications required to UK Link

3.) Detail changes required to appendix 5b of the UK Link Manual

4.) Detail impact on operating procedures and resources of the CDSP

5.) Implementation Plan

6.) Estimated implementation costs

6a.) How will the charging for the costs be allocated to different customer classes?  
(General Service Changes only)

Please mark % against each customer class:

National Grid Transmission

Distribution Network Operators and IGT's

DN Operator

IGT's

Shippers

**100%**

7.) Estimated impact of the service change on service charges

8.) Please detail any pre-requisite activities that must be completed by the customer prior to receiving or being able to request the service.

## Appendix One: Glossary

| Term                        | Definition  |
|-----------------------------|---|
| Adverse Impact              | <p>A Service Change has or would have an Adverse Impact on Customers of a particular Customer Class if:</p> <p>(a) Implementing the Service Change would involve a modification of UK Link which would conflict with the provision of existing Services for which such Customer Class is a Relevant Customer Class;</p> <p>(b) the Service Change would involve the CDSP disclosing Confidential Information relating to such Customers to Customers of another Customer Class or to Third Parties;</p> <p>(c) Implementing the Service Change would conflict to a material extent with the Implementation of another Service Change (for which such Customer Class is a Relevant Customer Class) with an earlier Proposal Date and which remains Current, unless the Service Change is a Priority Service Change which (under the Priority Principles) takes priority over the other Proposed Service Change; or</p> <p>(d) Implementing the Service Change would have an Adverse Interface Impact for such Customers.</p> |
| General Service             | A service provided under the DSC to Customers or Customers of a Customer Class on a uniform basis.  |
| Non-Priority Service Change | A Service Change which is not a Priority Service Change   |
| Priority Service Change     | <p>A Modification Service Change;</p> <p>or</p> <p>A Service Change in respect of a Service which allows or facilitates compliance by a Customer or Customers with Law or with any document designated for the purposes of Section 173 of the Energy Act 2004 (including any such Law or document or change thereto which has been announced but not yet made).</p>   |
| Relevant Customer class     | A Customer Class is a <b>Relevant Customer Class</b> in relation to a Service or a Service Change where Service Charges made or to be made in respect of such Service, or the Service subject to such Service Change, are or will be payable by Customers of that Customer Class  |
| Restricted Class Change     | Where, in relation to a Service Change, not all Customer Classes are Relevant Customer Classes, the Service Change is a <b>Restricted Class Change</b> ;  |
| Service Change              | <p>A change to a Service provided under the DSC (not being an Additional Service), including:</p> <p>(i) the addition of a new Service or removal of an existing Service; and</p> <p>(ii) in the case of an existing Service, a change in any feature of the Service specified in the CDSP Service Description,</p> <p>and any related change to the CDSP Service Description</p>   |
| Specific Service            | A service (other than Additional Services) available under the DSC to all Customer or Customers of a Customer Class but provided to a particular Customer only upon the order of the Customer.  |

## Appendix Two: Consultation Responses

As per the request at the Change Management Committee meeting on the 13<sup>th</sup> December 2017 this change was issued for consultation across the industry. The consultation closed on the 28<sup>th</sup> December 2017. The comments received will form the basis of discussion at the Change Management Committee on 10<sup>th</sup> January 2018 to approve or reject the change.

The following two comments were received:

| User           | Name                      | Date     | User Comments  |
|----------------|---------------------------|----------|--|
| EDF Energy     | Elly Laurence             | 22/12/17 | We are uncomfortable with the proposal around Meter Asset Installation Date. This feels like a proposal that is linked to Retrospective Asset style updates and until there is a firm decision around the Retro Asset process going forward we would suggest this type of change should not be considered as it would compromise some of that logic. |
| Scottish Power | Shane Preston             | 27/12/17 | We support to this change to ensure compliance and accuracy.   |
| NPower         | Maitrayee Bhowmick-Jewkes | 28/12/17 | This change is to allow submission and acceptance of RGMA flows in the 2 days between TRF (CO) and actual SSD (LI) and we have no real issue with it. However, seeing that the current process seems to be working without any problems, we don't see why we would want to change how things are at the moment.                                      |
