Document Purpose

This document is intended to provide a single view of a change as it moves through the change journey. The document is constructed in a way that enables each section to build upon the details entered in the preceding section. The level of detail is built up in an incremental manner as the project progresses.

The template is aligned to the Change Management Procedures, as defined in the CDSP Service Document. The template is designed to remove the need for duplication of information. Where information is required in one section but has been previously captured in a previous section, the previous section will be referenced.

The summary table on the front page shows the history and the current status of the Change Proposal.

Overview of proposed change			
Change Details		<p>As a result of UK Link Programme (Release 1) implementation, several critical changes have been identified for delivery in Q4 2017. The Release 1.1 delivery is focused on changes that need to be implemented by the end of 2017. There are 4 changes that have been identified for delivery within Release 1.1 of which all are classed as defects.</p> <p>These 4 defects will be internally funded.</p> <p>The below changes have been represented at SDG who proposed a priority for the change and ChMC ratified and approved the priority of the change provided by SDG:</p> <p>UKLP113 Notification of Formula Year AQ and SOQ - There is a requirement to notify Users at Month -5 of changes to the Rolling and/or Formula year AQ/SOQ following the monthly calculation/update process. This change is to deliver the offer addendum process (the S91) for the Formula year AQ value.</p> <p>Service Area 6: Annual Quantity, DM Supply Point and Offtake Rate Reviews</p> <p>UKLP272 Capacity Referrals raised in error following nomination – Amendment of rules to not issue a referral in the instance when the User has requested prevailing SOQ/SHQ values but the SOQ/SHQ is >16 /<24 (in line with CA GEN rules).</p> <p>Service Area - 1 Manage supply point registration</p> <p>UKLP279 Pending Capacity amendment with ratchet – Update existing functionality to consider pending capacity amendments when a</p>

This change has been raised to validate that; the recipient within the file header is the same as the Shipper short code within records, where any discrepancies are found – these should be rejected.</p> <p>Service Area - 1 Manage supply point registration</p>
