Please note any representation received in respect of Modification 0xxx will be carried forward should parties not wish to change their original representation.

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

This facilitating Modification will support the future physical reverse flow of gas in the BBL Interconnector and will therefore be consistent with European objectives for promoting gas security of supply. Additionally, providing a new route for the export of gas will help to promote competition in gas supply.
