UNC Modification Proposal 0674V - Performance Assurance Techniques and Controls

Dear Bob,

Thank you for your invitation seeking representations with respect to the above Modification Proposal which Cadent would like to support.

Do you support or oppose implementation?

Support

Relevant Objective:

- d) Positive
- f) Positive

Reason for support/opposition:

Within our previous representation for 0674, whilst being broadly supportive, Cadent provided comments only and highlighted the change would negatively impact Relevant Objective (f) due to lack of UNCC oversight and for meetings to be chaired by non J.O parties.

The proposer has made a number of amendments within 0674V which addresses our concerns, and we now support implementation of the modification.

Implementation

We agree with the proposer that implementation should be no less than 3 months after an Authority decision.

Impacts and Costs

No direct costs identified.

Legal Text

As legal text provider we are satisfied that the text is aligned with the business rules within the modification.

Are there any errors or omissions in this Modification Report that you think should be taken into account?

We have not identified any further errors or omissions.

Please provide below any additional analysis or information to support your representation

We trust that this information will assist in the compilation of the Final Modification Report. Please contact me on 07884 113385 (andy.clasper@cadentgas.com) should you require any further information.

Yours sincerely,

Andy Clasper
