<b>Support or oppose implementation?</b>	Support
<b>Relevant Objective:</b>	<b>d)</b> Positive <b>f)</b> Positive

#### Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

As proposer of this modification we support implementation to allow the addition of the ESO (Electricity System Operator) as a new User type to the Data Permissions Matrix and to UNC TPD V5.5.2(j). This modification will enable NG ESO to request access to specific information held by the CDSP to facilitate the completion of relevant analysis to enable collation of the FES/ETYS reports.

This change would primarily further Relevant Objective (f), the promotion of efficiency in the implementation and administration of the Code as it will facilitate the release of the subsequent information via the agreement of the DSC Contract Management committee (CoMC).

#### Self-Governance Statement:

We support self-governance as the modification purely facilitates the recognition of the ESO as a new user type to DPM and UNC; there is no material impact on other Users.

#### Implementation:

We support a joint IGT UNC and UNC implementation with the same coordinated date, this we believe better facilitates the CoMC. If approved at separate times the CoMC cannot approve until the last modification approval is given.

**Impacts and Costs:**

As this is a permissions modification there are no associated costs.

**Legal Text:**

We are satisfied that the Legal Text will deliver the intent of the solution.

**Are there any errors or omissions in this Modification Report that you think should be taken into account?**

We have not identified any such errors or omissions.

**Please provide below any additional analysis or information to support your representation**
