

UNC 0820:

Mod Title: Clarification on how many decimal places the Conditional NTS Capacity Charge Discount is calculated to

Proposer: National Grid NTS

Panel Date: 15/09/2022

Why change?

- Two clarifications in the legal text have been noted when compared with the UNC 0728B solution.
- UNC 0728B Business Rules state that the CNCC Discount would be calculated to the nearest whole percentage point, and this is how the calculation was built in the system.
- Business Rules also state that Capacity Charges levied at the Discounted Reserve Price will be invoiced and payable in accordance with UNC TPD Section S.
- Both the instruction on how to round the CNCC Discount and the reference to Section S were inadvertently omitted from the legal text.

Options

- To make an amendment to the description of the term Conditional NTS Capacity Charge Discount (CNCC Discount) in UNC TPD Section Y Paragraph 5.1.2, to include the correct rounding process.

And...

- To make an amendment to UNC TPD Section B stating that Capacity Charges levied at the Discounted Reserve Price will be invoiced and payable in accordance with UNC TPD Section S.

Solution

- Append the description of CNCC Discount in UNC TPD Section Y Paragraph 5.1.2 (b) with the following:

CNCCD is the applicable CNCC Discount (rounded to two decimal places)

- Inset the following paragraph into UNC TPD Section B under 9.3.10:

Capacity Charges levied at the Discounted Reserve Price will be invoiced and payable in accordance with UNC TPD Section S.

Recommended Steps

- The Proposer recommends that this modification should be:
 - Subject to Fast Track Self-Governance because it is a housekeeping Modification required as a result of a minor omission in the Legal Text implemented for UNC Modification 0728B.
