# NTSCMF System Operator (SO) Incentive Performance

02 August 2022

nationalgrid

# **Action: CMF004 SO Incentive Performance**

## **CMF004: SO Incentive Performance**

**Action Wording: Request for greater transparency of reporting to understand National Grid performance in nearer to real-time against the particular metrics. Ofgem has consulted on RIIO PCFM reporting. National Grid to check whether additional reporting will appear on the NTS operations web-page / Operational Forum.**

# Data available on website

Within the following website: <https://www.nationalgrid.com/gas-transmission/about-us/system-operator-incentives> there is details of the SO incentive performance.

The screenshot shows the National Grid website page for 'System operator incentives'. The page features a navigation menu with categories like Balancing, Capacity, Charging, Connections, Data and operations, Land and assets, Insight and innovation, Metering, and About us. The main content area is titled 'System operator incentives' and includes a paragraph explaining the SO's role and the incentive framework. Below this is a large image of a worker in a high-visibility vest and hard hat. To the right of the image is a blue box with the heading 'About gas incentives' and a 'Quick links' section. The 'Quick links' section lists several reports and documents, including RIIO-GT2 Quarterly Reports for Jan-Mar22, Oct-Dec21, Jul-Sep21, and Apr-Jun21, as well as a Supporting information document, Gas operations and data, Ofgem System Operator webpage, Joint Office Calendar, and Electronic Public Register (ePR).

**System operator incentives**

We are the system operator (SO) of the gas transmission network. To imitate the commercial pressures that would normally apply to a company in a fully competitive market, we are subject to a number of performance incentives. These SO performance incentives aim to maintain and improve our daily operational efficiency and are subject to renegotiation at set intervals.

**About gas incentives**

The SO incentive framework was implemented by Ofgem in 2013/14 and lasted for eight years, known as RIIO-T1 price control. RIIO-T2 price control will start in April 2021 and will last for five years. Under this framework, we have a set of outputs that we have agreed with our stakeholders. We deliver these outputs in return for an allowance that we have agreed with the regulator Ofgem. You can find a general overview of gas system operator Incentives in our Supporting Information Document. Documents relating to previous consultations and schemes can be found under the Data and documents header below.

**Quick links**

- > RIIO-GT2 Quarterly Report Jan-Mar22
- > RIIO-GT2 Quarterly Report Oct-Dec21
- > RIIO-GT2 Quarterly Report Jul-Sep21
- > RIIO-GT2 Quarterly Report Apr-Jun21
- > Supporting information document
- > Gas operations and data
- > Ofgem System Operator webpage
- > Joint Office Calendar
- > Electronic Public Register (ePR)

**Current SO incentives**

These are the areas where incentives are in place:

- Link provided will take you to the details of the SO Incentives.
- Blue box on the right with quick links will take you to the Quarterly Reports.
