Dear Sir or Madam

### **UNC Urgent Modification 0797**

The Major Energy Users Council supports the implementation of this Modification, as it provides a clear process for apportioning costs between domestic and non-domestic sectors and so will further relevant objectives a) and c).

We note the similarity between 0687 and this modification and our support would be for whichever can be implemented in time for the GDNs to amend their charges from 1<sup>st</sup> April 2022, however as by linking the recovery of SoLR cost to the end consumers usage this modification should result in a fairer distribution of costs.

MEUC would also repeat that as the recovery of the SoLR cost in a single year will lead to a large increase in domestic transportation charges followed by a similar reduction for the following year, a means should be found to spread the recovery over the remaining four years of the current GDN price control.

Yours truly,

Eddie Proffitt  
Technical Director, MEUC
