# **RIIO-T3 Incentive Arrangements**

# RIO-T3 Incentive Engagement

## What are the existing incentive arrangements?

- The incentive arrangements are designed to minimise the overall cost of system operation leading to benefit for customer and consumers. Their objective is to influence our behaviour and to minimise the impact we have on the market, to consider environmental impacts of how we run the network and to support the efficient operation of the wholesale gas market.
- More information on incentives, as well as our quarterly performance reports, can be found on our website: [Gas Operator Incentives](#).

## How are the incentives going to change in RIO-T3?

- RIO-T3 Team are planning industry engagement to commence in January.
- We will be contacting our customers in the next couple of weeks asking for an opportunity to discuss whether the current schemes continue to drive valuable outcomes to your business and your interests, if/how the structures of the existing incentives should change, and if we need to develop incentives in any other areas of Gas Transmission.

Please contact us with any questions or feedback on the incentive arrangements:

- Chris Hewitt, T3 Officer ([chris.hewitt@nationalgas.com](mailto:chris.hewitt@nationalgas.com))
- Anna Stankiewicz, Incentives Analyst ([anna.stankiewicz@nationalgas.com](mailto:anna.stankiewicz@nationalgas.com))
