

UNC [Request] Workgroup Individual Terms of Reference

0869 – Revision to the Calculation Methodology of the Security Amount for Planning and Advanced Reservation of Capacity Agreement (PARCA)

Introduction

This is an Individual Terms of Reference that includes matters referred from Panel or identified within any initial representations. It replaces the standard Terms of Reference.

Purpose of the Modification and its Solution

Please refer to www.gasgovernance.co.uk/0869

It is proposed that this Modification would revise the price used in the calculation of the Security Amount for reservation of Capacity through a Planning and Advanced Reservation of Capacity Agreement (PARCA) from a Weighted Average Price (WAP) for Entry and Exit sites to the Reserve Price. This will ensure the Security Amount reflects the current Reserve Price determination rather than an average of geographically different prices that are no longer applicable.
