03 March 2004

Dear Colleague,

**CO85: Changes to the Energy balancing Credit Arrangements for the Trading System Operator.**

Modification Proposal 0609 'Changes to Energy Balancing Credit Arrangements for the Trading System Operator', which was raised by NGT on 15 January and approved by Ofgem on 11 November 2003, sought to add a new paragraph 2.10 into Section X of the NGT Network Code. This reference was included in the legal text provided as part of the Final Modification Report and the subsequent Notice of Implementation. However, during the period mentioned above, a subsequent Modification Proposal 629 'Minimum Level of Security for Energy Balancing' was raised by NGT and approved by Ofgem, which also sought to introduce a new paragraph 2.10 to Section X.

Given the above, NGT has requested Ofgem's consent to amend the reference(s) within Modification 609 from 2.10 to 2.11. Other than references to this paragraph, there are no changes to the text.

Ofgem has considered Transco's request in accordance with condition 9 (7) (b) of Transco's Gas Transporter Licence, and consents to this modification of the Network Code. If you require any further information on this matter please feel free to contact me on the above number.

Yours sincerely

A handwritten signature in black ink, appearing to read "S. McEwen".
