03 November 2003

Dear Colleague,

**CO82 - Application for Consent to Modify Transco's Network Code, 'Modification to LTSEC Weak Closure Rule'.**

Following the acceptance of CO80 'Revision of the Network Code Document Format' Transco will be adopting a new, consistent numbering convention within its Network Code. This will be applied to the existing text of the Network Code as well as any modifications made to it. It is believed that this re-formatting exercise will better facilitate the management of updates to and new releases of the Network Code as well as making their subsequent publication easier to manage.

Transco raised this consent to modify its Network Code (CO82) in order to make minor amendments to the legal text provided by it in facilitation of modification proposal 623, which was accepted by the Authority and implemented with effect from 23 August 2003. These amendments will align the paragraph numbering with the convention mentioned above.

Ofgem has considered Transco's request in accordance with condition 9 (7) (b) of Transco's Gas Transporter Licence, and consents to this modification of the Network Code. If you require any further information on this matter please feel free to contact me on the above number.

Yours sincerely

A handwritten signature in black ink, appearing to be "S. McEwen", written in a cursive style.
