26th April 2002

Dear Adrian,

Modification proposal 0546 “Application of SO Commodity Charges to Storage Facilities”

At the Panel meeting on the 18th April you presented this proposal to the Panel, but pointed out that there was a mistake in the wording in part a) of the proposed charges, whereby the reference to “system operator” should have been to “storage operator”.

As this is a material change to the proposal, do you wish to withdraw this proposal and replace it with a corrected version as the topic has now been referred to the Capacity workstream, or would you prefer for Transco to highlight this error in the modification report.

I look forward to your instruction.

Yours sincerely,

Julian Majdanski
