Dear Colleague,

**Modification Proposal 0541 'Inclusion of Unsold Baseline Capacities in Day Ahead Capacity Auctions'**

Ofgem has considered the request from Transco for Modification Proposal 0541, 'Inclusion of Unsold Baseline Capacities in Day Ahead Capacity Auctions' to follow urgent procedures. We agree that this modification merits urgent status.

This modification proposal provides for an amendment to the Network Code such that the calculation of quantities of capacity to be offered for sale at the day ahead stage includes any unsold baseline capacity as proposed by Ofgem in its NTS System Operator (SO) Incentives Final Proposals. Transco has stated in raising the proposal, that it anticipates revised SO incentives being implemented via Gas Transporter (GT) Licence amendments with effect from 1 April 2002. However, these licence amendments will not be in place before 1 April. Transco has therefore sought urgent status for this proposal to ensure that new arrangements can be put into effect from 1 April 2002 through transitional arrangements in the Network Code.

An urgent decision on this process will provide Transco and shippers with certainty on the transitional arrangements for Transco's obligations with regards to unsold baseline capacity under the entry capacity incentive arrangements that will take effect from 1 April 2002 before any amendment of the GT licence can be made. On this basis, this modification proposal merits urgent status.

The timetable for the modification proposal to follow urgent status is set out below.
