

**Modification 0514 Development Work Group**  
**Monthly Report to the Modification Panel March 2002.**

Since the last report the Workgroup had 3 meetings planned for 19 February, 5 March and 19 March respectively, summary of discussions below:

**19 February**

The meeting focused on the proposed standard for Query Resolution

Topics tabled for discussion were, Definition of a Query, Data Quality and Shadowlog Arrangements.

The meeting progressed well and Transco agreed to take away the following actions:

- To re draft the Bosworth query definition to reflect changes post Metering liberalisation
- To provide clarity in respect of what constitutes a PSQ for inclusion in standard
- To provide examples of invalid / poor quality queries
- To provide copies of a list of data items compiled during discussions on Data Rationalisation (Mod 173/174&194)

The group agreed that these items should be scheduled for discussion prior to moving on in the next meeting to debate the proposed performance levels and relative incentive payments.

The meeting closed with discussions being incomplete in respect of the Shadow Log arrangements, again it was agreed by the group that these discussions should be scheduled ahead of the debate in respect of performance levels and incentive payments.

**5 March**

Unfortunately this meeting was not quorate and with only one shipper and an Ofgem representative present the meeting had to be cancelled on the day. Those present agreed that in order to avoid a recurrence of this situation and in an attempt to avoid unnecessary costs for both Shippers and Transco the meeting would be cancelled unless confirmation of attendance was received from sufficient members to indicate that a quorum would be achieved 48hrs prior to each meeting.

**19 March**

At the Workgroup's request Transco took away an action to reschedule this meeting due to a clash with the CPM Ops forum, a meeting was scheduled for 13 March, however, again we were unable to achieve a quorum with only one shipper representative confirming attendance for part of the day.

The Workgroup Chairman would like the Panel to note his concern at the apparent lack of priority Shippers are indicating to this Workgroup.
