Dear Bob

**Response to UNC Modification Proposal 0268:
Change to the Provisions Determining the Earliest Reading
Applicable within the AQ Review**

We believe that this proposal is necessary to align the revised derived Weather Adjusted Load Profiles to the AQ process, however we feel that the extremely short notice period will require shippers to implement manual processes to augment their automated AQ calculation methods and thus will incur potentially significant cost.

We have not yet fully evaluated the work necessary to change systems and so can only offer qualified support.

Yours sincerely

Brian Durber (by email)
