

**Draft Modification Report**  
**RG0252 Proposal 12: Timeframes for establishing and extending Guarantees and**  
**Letters of Credit**  
**Modification Reference Number 0309**  
**Version 1.0**

This Draft Modification Report is made pursuant to Rule 9.1 of the Modification Rules and follows the format required under Rule 9.4.

**1 The Modification Proposal**

WWU raised Review Group 0252 “Review of Network Operator Credit Arrangements” in April 2009. This was convened to discuss the appropriateness of the existing credit management arrangements, taking into account the many credit related issues which had occurred since the publication of Ofgem’s “Best practice guidelines for gas and electricity network operator credit cover” (BPG) document”.

This specific proposal further clarifies the timeframes around establishing and maintaining Guarantees and Letters of Credit (LOC). Both are different types of surety, however their worth in terms of credit protection differs as their end dates near.

A Guarantee can reasonably be deemed valid for the purposes of surety up until the date of its expiry, whereas a LOC should only be deemed valid in terms of the level of surety until 30 days prior to its expiry, to allow time to present any claim prior to its expiry.

A Guarantee can be called upon at any point for any invoice amounts/invoices incurred up to the expiry date of the Guarantee. For example, if the Guarantee expires on 31<sup>st</sup> October 2010, it can be utilised to recover unpaid invoice amounts due or raised prior to 31<sup>st</sup> October 2010 (albeit having no value in terms of surety from 1<sup>st</sup> November 2010 onwards)

A LOC can only be presented (by the Transporter) within the timeframe of the LOC. For example if the LOC expires on 31<sup>st</sup> October 2010, it has zero worth from 1<sup>st</sup> November 2010 both in terms of surety and leverage to recover unpaid invoiced amounts.

GUARANTEE	LOC
Assuming Guarantee end dated 31 <sup>st</sup> October, credit limit (based on this Guarantee) will be set to zero if Guarantee not extended or replaced by 30 <sup>th</sup> September with document effective 1 <sup>st</sup> November (or earlier).	Assuming LOC end dated 31 <sup>st</sup> October, credit limit will be set to zero if LOC not extended or replaced by 30 <sup>th</sup> September (or earlier)

**Suggested Text**

**3.2.4**

(a) A User's Code Credit Limit may from time to time be reviewed and revised, in accordance with the Code, save where either paragraph 3.2.5 or 3.2.6 applies, in the case of ~~a(i)~~, ~~b(ii)~~, ~~d(iv)~~ and ~~e(v)~~ on notice of not less than 30 Days, or in the case of ~~e(iii)~~ below on notice of not less than 2 Business Days following the Business Day on which a notice is issued in accordance with 3.2.9, (or in any such case, such lesser period agreed by the User) to the User:

- ~~a(i)~~ At intervals of approximately 12 months
- ~~b(ii)~~ At the User's request (but subject to 3.2);
- ~~e(iii)~~ Where any published or Specially Commissioned Rating of the User or any person providing surety for the User is revised downwards
- ~~d(iv)~~ Where any instrument of surety or security expires or is determined
- ~~e(v)~~ At the Transporter's request where the Transporter has reasonable grounds to believe that the effect of the review will be to reduce the User's Code Credit Limit

(b) A Letter of Credit is deemed zero value for User's Code Credit Limit purposes 30 days prior to the date of its expiry.

(c) A Guarantee is deemed zero value for User's Code Credit Limit purposes 30 days before expiry unless either extended or replaced by security or surety effective from no later than the day after the expiry date of the existing guarantee.

3.2.8 The Transporter will not be obliged to agree to any request of the User under paragraph

3.2.4~~(b)~~ (ii) unless the User agrees to reimburse to the Transporter the reasonable costs and fees payable by the Transporter to any third party in accordance with the Code in connection with such request.

3.2.9 Where a User's Code Credit Limit has been revised downwards in accordance with paragraph 3.2.4~~(e)~~ (iii) above, the Transporter will notify the User accordingly on the next.

## **2 User Pays**

### **a) Classification of the Proposal as User Pays or not and justification for classification**

This Proposal is not classified as a User Pays Modification Proposal as it does not create or amend any User Pays Services.

### **b) Identification of Users, proposed split of the recovery between Gas**

**Transporters and Users for User Pays costs and justification**

No User Pays charges applicable.

**c) Proposed charge(s) for application of Users Pays charges to Shippers**

No User Pays charges applicable to Shippers.

**d) Proposed charge for inclusion in ACS – to be completed upon receipt of cost estimate from xoserve**

No charges applicable for inclusion in ACS.

**3 Extent to which implementation of the proposed modification would better facilitate the relevant objectives**

*Standard Special Condition A11.1 (a): the efficient and economic operation of the pipe-line system to which this licence relates;*

Implementation would not be expected to better facilitate this relevant objective.

*Standard Special Condition A11.1 (b): so far as is consistent with sub-paragraph (a), the coordinated, efficient and economic operation of*

*(i) the combined pipe-line system, and/ or*

*(ii) the pipe-line system of one or more other relevant gas transporters;*

Implementation would not be expected to better facilitate this relevant objective.

*Standard Special Condition A11.1 (c): so far as is consistent with sub-paragraphs (a) and (b), the efficient discharge of the licensee's obligations under this licence;*

Implementation would not be expected to better facilitate this relevant objective.

*Standard Special Condition A11.1 (d): so far as is consistent with sub-paragraphs (a) to (c) the securing of effective competition:*

*(i) between relevant shippers;*

*(ii) between relevant suppliers; and/or*

*(iii) between DN operators (who have entered into transportation arrangements with other relevant gas transporters) and relevant shippers;*

Secures effective competition between shippers by reducing the risk of Transporters being 'timed out' for claiming on certain surety credit forms, which could lead to bad debt being passed through to Users via transportation charges.

*Standard Special Condition A11.1 (e): so far as is consistent with sub-paragraphs (a) to (d), the provision of reasonable economic incentives for*

*relevant suppliers to secure that the domestic customer supply security standards... are satisfied as respects the availability of gas to their domestic customers;*

Implementation would not be expected to better facilitate this relevant objective.

*Standard Special Condition A11.1 (f): so far as is consistent with subparagraphs (a) to (e), the promotion of efficiency in the implementation and administration of the network code and/or the uniform network code;*

Efficiency is gained by more clearly defining the timeframes within which shippers may opt to use the surety available to them to maintain their Code Credit Limits with Transporters.

**4 The implications of implementing the Modification Proposal on security of supply, operation of the Total System and industry fragmentation**

No implications on security of supply, operation of the Total System or industry fragmentation have been identified.

**5 The implications for Transporters and each Transporter of implementing the Modification Proposal, including:**

**a) Implications for operation of the System:**

There are no implications for operation of the System.

**b) Development and capital cost and operating cost implications:**

There are no cost implications.

**c) Extent to which it is appropriate to recover the costs, and proposal for the most appropriate way to recover the costs:**

Not applicable.

**d) Analysis of the consequences (if any) this proposal would have on price regulation:**

Not applicable.

**6 The consequence of implementing the Modification Proposal on the level of contractual risk of each Transporter under the Code as modified by the Modification Proposal**

The contractual risk of each Transporter is reduced by this proposal as it better articulates the timeframes by which credit limits can be assigned and maintained with shippers.

**7 The high level indication of the areas of the UK Link System likely to be affected, together with the development implications and other implications for the UK Link Systems and related computer systems of each**

## **Transporter and Users**

No implications have been identified.

### **8 The implications of implementing the Modification Proposal for Users, including administrative and operational costs and level of contractual risk**

#### ***Administrative and operational implications (including impact upon manual processes and procedures)***

Users may need to ensure their timeframes for re establishing LOC and Guarantees are consistent with the timeframes outlined in the proposal, but as this is consistent with previous regimes for Guarantees and LOC's under previous Code Credit Rules, it is not expected to be a material issue.

#### ***Development and capital cost and operating cost implications***

To be advised by Users.

#### ***Consequence for the level of contractual risk of Users***

The Contractual risk of Users is improved by this proposal, as it provides greater clarity for the timeframes which will protect the required credit limits of Users, and better ensures they maintain the credit limits they require with transporters.

### **9 The implications of implementing the Modification Proposal for Terminal Operators, Consumers, Connected System Operators, Suppliers, producers and, any Non Code Party**

No implications have been identified.

### **10 Consequences on the legislative and regulatory obligations and contractual relationships of each Transporter and each User and Non Code Party of implementing the Modification Proposal**

No consequences have been identified.

### **11 Analysis of any advantages or disadvantages of implementation of the Modification Proposal**

#### **Advantages**

- provides clarity and certainty for all Users on timeframes for re-establishing lines of credit using these two forms of surety.
- reduces likelihood of Transporters being timed out when claiming against surety, therefore protecting Users from potential User bad debt being charged via Transportation charges.

#### **Disadvantages**

No disadvantages have been identified.

**12 Summary of representations received (to the extent that the import of those representations are not reflected elsewhere in the Modification Report)**

*Written Representations are now sought in respect of this Draft Report.  
Consultation End Date: 30 July 2010*

**13 The extent to which the implementation is required to enable each Transporter to facilitate compliance with safety or other legislation**

Implementation is not required to enable each Transporter to facilitate compliance with safety or other legislation.

**14 The extent to which the implementation is required having regard to any proposed change in the methodology established under paragraph 5 of Condition A4 or the statement furnished by each Transporter under paragraph 1 of Condition 4 of the Transporter's Licence**

Implementation is not required having regard to any proposed change in the methodology established under paragraph 5 of Condition A4 or the statement furnished by each Transporter under paragraph 1 of Condition 4 of the Transporter's Licence.

**15 Programme for works required as a consequence of implementing the Modification Proposal**

No programme of works would be required as a consequence of implementing the Modification Proposal.

**16 Proposed implementation timetable (including timetable for any necessary information systems changes and detailing any potentially retrospective impacts)**

It is suggested that this Proposal be implemented on 1<sup>st</sup> October 2010 to coincide with the implementation of the other credit proposals being considered in this timeframe. Should this date not be achievable, then implementation could take place immediately following an Authority direction.

**17 Implications of implementing this Modification Proposal upon existing Code Standards of Service**

No implications of implementing this Modification Proposal upon existing Code Standards of Service have been identified.

**18 Recommendation regarding implementation of this Modification Proposal and the number of votes of the Modification Panel**

**19 Transporter's Proposal**

This Modification Report contains the Transporter's proposal to modify the Code and the Transporter now seeks direction from the Gas and Electricity Markets Authority in accordance with this report.

**20           Text**

**Representations are now sought in respect of this Draft Report and prior to the Transporters finalising the Report.**

For and on behalf of the Relevant Gas Transporters:

**Tim Davis**  
**Chief Executive, Joint Office of Gas Transporters**
