Neil Cole	Xoserve

### 1. Presentation by AUGE

Clive Whitehand and Andy Gordon went through the GL Group presentation. A copy of this can be found at:

<http://www.gasgovernance.co.uk/sites/default/files/GL%20-%20Industry%20Workshop.pdf>

The contact email address for the AUGE is:

[AUGE@gl-group.com](mailto:AUGE@gl-group.com)

### 2. Matters arising

It was confirmed that it was not expected the AUGE would hold meetings with individual shippers or a sub-set of the shipper community. Meetings would be open to all industry participants.

It was recognised that iGTs may hold data required by the AUGE it was unclear if there were any obligations on iGTs to respond to requests from the AUGE. This is to be reviewed by the Gas Transporters and an update provided to the [April] UNCC.

In addition to the unregistered sites topic it was considered that the AUGE should also consider “unknown” sites (sites consuming gas but not recorded on UK Link systems). It was confirmed this would be included in the unregistered topic.

GL Group considered they would assess the application of the shrinkage error between market sectors and would make any appropriate recommendations.
