# Retrospective Updates

## Update from RAASP Workshops

12<sup>th</sup> January 2016

# Background

- The RAASP (Retrospective Adjustments for Assets & Supply Points) desktop validation exercise presented at the PNSG on 3<sup>rd</sup> August recommended that the RAASP design phase is facilitated by a series of industry workshops.
- The workshops were intended to
  - Provide an opportunity for dialogue between Xoserve and Market Participants during the design phase.
  - Ensure all parties have a common understanding of the in scope requirements and the proposed solution.

# RAASP Design Plan

- The design plan for RAASP (including a proposed industry workshop schedule) is outlined below
- The first Xoserve design activity within the plan is a high level assessment of the full RAASP scope and a deep dive review of a high complexity topic area (*meter removal scenarios*). The outcome of this exercise will be used to validate the full workshop schedule and overall design timelines
- This approach will also be used for the first industry workshop (hence indicative dates for later workshops)
- The proposed topic areas for each industry session replicates the schedule of deep dive workshops which Xoserve will conduct. A contingency industry workshop has also been planned to accommodate any parked or open items from previous workshops

**Workshop 1**

**Timing**

- 29<sup>th</sup> September

**Content**

- High level playback of full RAASP scope
- Meter Removal scenario walkthroughs (A PoC to validate the overall plan)

**Workshop 2**

**Timing**

- 19<sup>th</sup> October – Xoserve, Solihull

**Content**

- Meter Exchange and Install scenario walkthroughs
- Corrector Exchange & Install scenario walkthroughs

**Workshop 3**

**Timing**

- 4<sup>th</sup> November - Holiday Inn, Solihull

**Content**

- Supply Point Amendments scenarios (e.g. Correction Factors)
- Rejection Codes & Complex File Formats Scenarios

**Workshop 4**

**Timing**

- 3<sup>rd</sup> December – Holiday Inn, Solihull

**Content**

- Contingency Workshop
- Retro Updates prior to Code Cut Off Date (Line in Sand)
- Retro Updates to iGT and Retro Updates to 'Unique Sites'

**Tcon/Webex**

**Timing**

- 4<sup>th</sup> January

**Content**

- Retro updates prior to Code Cut Off Date (LiS)
- On iGT meter points
- Where Check Read obligations apply
- Update is requested to forward date an existing activity
- 'Unique Sites'
- Rejection Codes
- Retro file

- Four workshops have taken place to walk through and agree the processes for all retrospective update activities / scenarios
- T-con on 4<sup>th</sup> January took place to close down outstanding actions & review updates made to presentation
- Areas presented & discussed were;
  - Retrospective asset installation
  - Retrospective asset removal
  - Retrospective asset exchange
  - Installation/Removal read update
  - Impacts of updates prior to Code Cut-Off date (LiS)
  - Retro updates on iGT meter points
  - Read replacement (although not part of RAASP)
  - Example file flows

# Next Steps

- Any issues or concerns raised at the workshops have been referred back to PN UNC for agreement
- Any issues, questions or actions raised were logged & managed at the workgroups.
- There are no changes to the requirements documented in the Retrospective Updates BRD
- Any new requirements have been logged and will be managed through PN UNC for a future release
- Proposed file formats and rejection codes will be presented to UKLink Committee & approval gained via this forum
- Slides will be added to the Retro Updates BRD as an appendix
