

Review Group 0162 Monthly Report to Panel

Meetings Held

21 January 2008, Elexon, 350 Euston Road.

Planned

Mid March, date and time to be advised

Matters for Panel's Attention

The Review Group has completed its work and was due to report to the Panel.

Modification Proposal 0186 "Provision of Cost Information" has been raised and sent to consultation and the Modification Proposal to introduce the future governance of the process has been agreed in principle and is to be raised shortly. However it was considered to be prudent to await the outcome of UNC modification 0186 before formally raising it.

The Proposer of Review Proposal 0162 also indicated a preference to await the Authority decision on 0186 and any proposed amendments to the original intent of 0162 in light of Scotia Gas Networks' alternate Proposal 0186A, before concluding the Group's work.

Therefore the Review Group requests an extension to the time for the Review Group to report for three months.
