B91 3QJ

02 September 2005

Dear Julian,

Modification Proposal 0033 - "Impact on Code Communications"

Total Gas & Power Limited (TGP) supports the above modification.

We agree with the proposer that Internet/email communications enables real time updates to Users of critical events and that the utilization of such communication methods will realise operational efficiencies. Hence this modification will further the code relevant objectives.

We are concerned however that this notification method may not be used by all of the four Distribution Network Operators. The most efficient or cost-effective method of notifying shippers of network incidents would be for all DNO's to use the same system. A fragmented approach could also lead to delays in dealing with such events.

Should you wish to discuss our response further, please feel free to contact me.

Yours sincerely,

(This message is sent electronically and is therefore not signed)
