

TRANSCO NETWORK CODE MODIFICATION PROPOSAL No. 0301

SHORT TITLE: Introduction of Nine Tranche Partial Interruption

DATE: 26/11/98

PROPOSED IMPLEMENTATION DATE: ASAP

URGENCY: Non Urgent

JUSTIFICATION:

The partial interruption service was originally set up with a maximum of five tranches. A move to nine tranches allows greater flexibility for the customer and mirrors the arrangement that is in place for interconnectors.

CONSEQUENCE OF NOT MAKING THIS CHANGE:

If this change is not made then the inconsistency between interconnectors and supply points will continue and users would be unable to benefit from the greater flexibility.

AREA OF NETWORK CODE CONCERNED:

Section G6.10.2(i) - page G-75

NATURE OF PROPOSAL:

Change the maximum number of tranches allowable in the above paragraph from 5 to 9.

This will then read: "*the User shall specify the number of Tranches which it requires at the Supply Point, such number shall not exceed 9;* "

PURPOSE OF PROPOSAL:

This modification will improve the flexibility of the partial interruption service. This will benefit Consumers, Registered Users and Transco. This may lead to an increased use of the partial interruption service and hence lead to a more efficient use of the pipeline system, therefore satisfying the relevant objectives.
