

## **Development Workgroup 0325**

### **Draft Terms of Reference**

#### **Consolidation of Section G1.6 (AQs)**

##### **Composition**

To be confirmed at Modification Panel meeting on 15th April.

##### **Work to be Undertaken**

After two years of operation, business rules concerning Annual Quantities (AQs) and the AQ review process are located in both the Principal and Transition Documents of the Network Code with numerous cross references between the two. Following discussions with shippers, it has been agreed that this year's process will operate in a similar way to last year. However, the rules describing the process are predominately in the Transition Document and have a limited life span. Consequently, they need to be consolidated in the Principal Document.

The purpose of the group, therefore, will be to consolidate and refine the legal drafting to clearly identify the rights and obligations of shippers and Transco in this and future year's AQ reviews.

##### **Areas of Network Code Concerned**

The following sections of the Network Code will need to be modified.

Network Code Sections:	G1.6
Transition Document:	Part II (numerous deletions)

##### **Timetable**

It is Transco's intention that the Workgroup report to the Modification Panel in June and present legal drafting, developed sufficiently to enable the formal consultation process to commence.
