Date of Representation:	12 July 2018
Support or oppose implementation?	Support
Relevant Objective:	<p>c) <u>Positive</u> – the proposal will support a more efficient process for providing connections to the pipeline system and is therefore consistent with enabling the transporter to meet its licence obligations in this respect.</p> <p>d) <u>Positive</u> – the more efficient process will encourage faster and cheaper connections to the pipeline system and will therefore support competition in gas shipping and supply.</p>

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

We support the initiative to formally identify and more efficiently manage Standard Design Connections to the NTS. This initiative is essential to support the objectives of National Grid's Project CLoCC that aims to provide less costly but quicker connections to their pipeline system.

Self-Governance Statement: Please provide your views on the self-governance statement.

Self-governance is appropriate for this proposal.

Implementation: What lead-time do you wish to see prior to implementation and why?

As soon as practicable under the self-governance procedures.

Impacts and Costs: What analysis, development and ongoing costs would you face?

None identified.

Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?

No comment.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

None identified.

Please provide below any additional analysis or information to support your representation
