2 – Budget Movement & Change Pipeline	<ul style="list-style-type: none"> Industry voting and funding principles <ul style="list-style-type: none"> This agenda item was raised by WWU due to the funding voting outcome of XRN5482 in December ChMC. It was agreed that on raising a Change Proposal, the funding arrangement will be added by the proposer or default to the relevant Service Area and Charging Methodology funding split, as per the existing DSC Change Management guidelines. Due to the challenges raised it was agreed that Xoserve will assess the current guidelines and work directly with WWU to consider how these could be updated. It was also agreed that the Change Proposal form will be reviewed and updated if necessary, with the objective of ensuring proposed funding and benefits are transparent. Xoserve also agreed to review any inflight Change Proposals to ensure there is no ambiguity with the funding arrangements proposed against these changes. BP22 General Change – The paper submitted was a view from December 2022 as we are working on the EPG split with finance to ensure the funding split is correct. This has been more difficult due to splitting the funding by INC Shippers. A revised slide to represent this month will be published once completed. The Change Pipeline includes a delivery plan for all live Change Proposals. This has been broken down into July 2022 – February 2023, April 2023 – June 2023 and Change backlog. REC Change Update – Pipeline view of REC change provided
