#### **Matters for Network Code Committee's Attention**

None.

#### **Change Activity**

None.

#### **Topics Activity**

xoserve has now established on-line availability of documentation, currently displaying "NDM profile and capacity estimation parameter 2005/6" documentation, including the supporting files from the CD-ROM. The DESC members are currently trialling access and download times, and commenting to xoserve on their experiences.

Access is through the UKLink website, <https://www.xoserveextranet.com/uklinkdocs/default.asp> using an individually issued username and password. (This is a standard UKLink access and can be arranged through each company's Local Security Officer in the usual manner.)

If the trial is satisfactory the intention is to publish to this site and notify publication via email and letter, and it is suggested that interested parties may like to arrange access IDs and passwords in advance of open publication.
