FINAL AUG TABLE FOR AUG YEAR 2015/16

Dear Colleagues

In accordance with the “Guidelines for the Appointment of an Allocation of Unidentified Gas Expert and the provision of the Allocation of Unidentified Gas Statement” (“the Guidelines”) the AUGE provided a final table of Unidentified Gas Volumes to Gas Transporters on 31st December 2014. The Gas Transporters have an obligation under the Guidelines to publish the final AUG Table of volumes, along with an estimate of the rates to be levied, by February 1st each year. The Gas Transporters have asked Xoserve to publish the document “Final 2014 AUG Table for 2015_16” to satisfy this requirement.

It should be noted that the SAP (System Average Price – i.e. gas price) rates are only indicative and will remain so, as the actual rate applied each month will be the average SAP for the reconciliation month in question.

The Table has been updated by the AUGE since the publication of the Draft Table in October, as a result of more up-to-date information. The document details the changes from the interim table and explains the reasons for those changes. Therefore there is no need for a separate document to explain the changes from the Draft Table.

Next Steps

UNC (E10.4.3) requires the AUGE to submit the Final Table to the UNC Committee. The Final Table will therefore be presented to UNCC at its scheduled meeting on February 19th 2015. The possible outcomes are: revision of the Table by unanimous agreement of the meeting; or unanimous agreement to require further iteration; or otherwise adoption of the Table.

If you have any queries on this communication please do not hesitate to contact me. Queries on the details within the AUGS or AUG Table should be directed to the AUGE at the email address on page 11 of the Table.

Yours sincerely

Fiona Cottam
