**Ecotricity position on modification 0427S: Estimated Opening Meter Reads Code Amendment**

Dear Workgroup,

Ecotricity is an independent renewable energy generator and supplier. We started supplying gas in 2010 and now have over 16,000 gas customers.

We welcome this opportunity to put forward our comments on modification 0427S on amending the Opening Meter Reads Code.

Ecotricity appreciate the desire to reduce confusion practice by amending the code to state that opening meter reads will be accepted up to 10 days after the Supply Point Registration Date. As noted in the modification document, this would align the code with what occurs in practice.

However, we would like to raise one potential problem; this will make the requirement for opening gas meter reads different to electricity meter reads. We believe that this should be taken into consideration by the Workgroup.

Ecotricity welcomes the opportunity to respond and hope you take our comments on board. We also welcome any further contact in response to this letter. Please contact Emma Cook on 01453 769301 or [emma.cook@ecotricity.co.uk](mailto:emma.cook@ecotricity.co.uk).

Yours sincerely

  
AP. Emma Cook  
Head of Regulation, Compliance & Projects
