Dear John

### **Modification Proposals 0266 – Amendment to Gas Quality NTS Entry Specifications for the North Morecombe Terminal**

Thank you for the opportunity to comment on the above modification proposal. BP supports the implementation of this proposal.

The proposal seeks to align the Wobbe limits within the contractual agreements that specify the gas entry specifications at the terminal with those set out in the GS(M)R. These contractual agreements pre-date the introduction of the Network Code.

BP agrees with the proposer that if implemented this proposal would allow a wider range of gas to be landed at the North Morecombe terminal at Barrow thus adding to the security of supply.

BP also agrees with the proposer that implementation would better facilitate the achievement of the relevant objectives by increasing the efficient and economic use of the system and enhancing effective competition between relevant shippers.

If you wish to discuss further please don't hesitate to contact me on the number above.

Yours sincerely

**Andrew Pearce**
